PROFESSIONAL SUMMARY

Fresh Computer Science graduate with strong expertise in modern frontend development, specializing in React, Next.js, and TypeScript. Experienced in building responsive, high-performance, and accessible web applications with clean architecture and reusable components. Strong understanding of RESTful APIs, state management, and modern UI frameworks, with a proactive mindset for learning, problem-solving, and delivering quality user-centric solutions.

TECHNICAL SKILLS

- **Frontend:** React.js, Next.js, JavaScript (ES6+), TypeScript
- **UI & Styling:** Tailwind CSS, Material UI, shadcn/ui, Responsive Design
- **Backend:** Node.js, Express.js, RESTful APIs
- **Database:** MongoDB
- **Tools & Workflow:** Git, GitHub, Agile Development
- **Other:** Role-Based Access Control (RBAC), API Integration, Full-Stack Development

PROFESSIONAL EXPERIENCE

Frontend Developer Intern - Firm Tech Solution *Remote*

Nov 2023 – Jan 2024

- Built reusable React components and developed responsive, user-friendly interfaces.
- Integrated REST APIs and resolved frontend issues to enhance performance and user experience.
- Collaborated using Git and GitHub for version control and team coordination.

Full Stack Developer Intern - Punjab Sahulat Bazar (PSBA) *On-site*

Jul 2025 – Aug 2025

- Developed a web-based Complaint Management System to streamline complaint registration, tracking, and resolution.
- Implemented role-based access control for Users, Admins, and Super Admin ensuring secure workflows.
- Built modules for complaint submission, prioritization, processing, and resolution tracking.
- Integrated automated notification system to update users on complaint status.
- Enabled Super Admin features for department management, system monitoring, and performance oversight.

PROJECTS

CALIX – AI Assisted Caretaker for Neurodegenerative Disorder Patients (Final Year Project) Dec 2025

- Built an AI-powered Alzheimer care assistant integrating MRI analysis, chatbot, reminders, and medical management.
- Implemented CNN-based MRI classifier for dementia stage detection using Kaggle datasets.
- Developed a complete multi-role system for Admin, Doctor, and Patient with secure authentication and dashboards.
- Created a full-stack web platform using Next.js, Node.js, Express.js, MongoDB, TypeScript, Tailwind CSS, Material UI, and Docker.
- Implemented appointments, prescriptions, AI predictions, notifications, and automated data tracking.

EDUCATION

Bachelor of Science in Computer Science (BSCS) Bahria University, Lahore

Apr 2022 – Jan 2026
